

The easiest way for teachers to share their screens with their students

Screenleap allows teachers to share their screens with their students and record it for later viewing. Students can view from any web-enabled device without installing any software.

Use Screenleap to 1) allow students to follow along from anywhere and on any device, 2) make it easy for teachers to record and share recordings without having to manually upload them, 3) give students the ability to review lessons before exams, and 4) improve test scores by allowing students to stay caught up even when they are out.

FEATURES

Share from any device (PCs, Macs, Chromebooks, iPads, Android devices, SMART Boards, etc.)

View and listen from any web-enabled device without installing any software

Record from any device and share recordings without having to manually upload them

BENEFITS FOR TEACHERS

- Save 500+ hours/year by not having to reteach lessons that students miss during an absence
- Track student engagement in real-time
- Review recorded lessons to help with lesson planning

BENEFITS FOR STUDENTS

- Follow along as well from the back of the room as the front
- Watch lessons from home if they cannot attend school because of an illness
- Improve learning by being able to review lessons when studying for exams

BENEFITS FOR ADMINISTRATORS

- Improve test scores by allowing students to stay caught up even when they are out
- Reduce IT administration by not having to maintain software on students' computers
- Review teachers' lessons for observation purposes
